People with co-occurring Mental Illness and Developmental Disabilities (MI/DD) have complicated challenges due to the compounding functional limitations and significant disabilities inherent to concomitant diagnoses from two different diagnostic categories. Positive Behavior Supports is a person-centered approach that borrows principles from behaviorism to assist people who exhibit "challenging behaviors"—that present a hindrance to gainful employment and community inclusion. # The Role of Courts in Ensuring

# Care

# PRESENTER: James Piotrowski, J.D.

In its March 30th decision in Armstrong v. Exceptional Child, the United States Supreme Court held that providers (and, by implication, beneficiaries as well) may not turn to the courts for help in

requiring that states live up to the minimum legal terms of the Medicaid statute. As the representing/ arguing attorney in this landmark case, Mr. Piotrowski will lead a discussion on the role of litigation in the years ahead, when to rely on the courts (and when not to), and legal resources available to Idaho's disabled individuals, their families, and their care providers. *CEU CREDITS: 1.25*

CEU CREDITS: 1.25 INTENDED AUDIENCE: Direct Care Providers

# Creating Community with Natural Supports PRESENTER: Kathie Snow

Isn't it time for people with disabilities to move from clienthood, isolation, and dependence on the system to citizenship, inclusion, and interdependence in the community? It can happen when we use the abundant supply of natural supports and generic services in our communities to meet people's needs while simultaneously ensuring their inclusion! *CEU CREDITS: 1.25*
